

TARUN KRISHNA

Azure DevOps Engineer | DevOps Engineer | Cloud & CI/CD Specialist

+91-9597176872 | krishtarun2001@gmail.com | linkedin.com/in/tarun-krishna | github.com/Krish200122

PROFESSIONAL SUMMARY

Azure DevOps Engineer with 3+ years of experience in CI/CD automation, cloud infrastructure, Kubernetes (AKS), and Infrastructure as Code (IaC) in enterprise environments. Strong expertise in Azure DevOps, GitHub Actions, Docker, Kubernetes, and DevOps lifecycle including Continuous Integration, Continuous Deployment, release management, and automation engineering. Experienced in designing scalable cloud architectures using Microsoft Azure (IaaS, PaaS, SaaS), implementing multi-stage YAML pipelines, and automating deployments using ARM, Bicep, and Terraform. Proven ability in DevSecOps, monitoring, troubleshooting, and optimizing deployment pipelines for high availability, reliability, and performance across multi-tenant SaaS platforms.

CORE SKILLS (ATS OPTIMIZED – AZURE DEVOPS & DEVOPS)

- CI/CD & DevOps: Azure DevOps, GitHub Actions, Jenkins, Continuous Integration, Continuous Deployment, Release Management, DevOps Lifecycle
- Cloud Platforms: Microsoft Azure (IaaS, PaaS, SaaS), App Services, Azure Functions, AKS, ACR, Azure SQL
- Infrastructure as Code (IaC): Bicep, ARM Templates, Terraform, Infrastructure Automation, Cloud Provisioning
- Containerization & Orchestration: Docker, Kubernetes, Azure Kubernetes Service (AKS), Helm Charts, Microservices Deployment
- Version Control: Git, Git Workflows, Branching, Merging, Pull Requests, Repository Management
- Monitoring & Observability: Azure Monitor, Log Analytics, Application Insights, Prometheus, Grafana
- DevSecOps & Security: Azure Key Vault, HashiCorp Vault, RBAC, Secure CI/CD, Secret Management, Vulnerability Scanning
- Scripting & Automation: Bash, PowerShell, Python, Shell Scripting, YAML, JSON
- Operating Systems: Linux (Ubuntu, CentOS), Windows Server
- Methodologies: Agile, Scrum, SDLC, Troubleshooting, Incident Management, Problem Solving

PROFESSIONAL EXPERIENCE

Azure DevOps Engineer | Tamuinfotech | Jan 2023 – Present

- Designed and implemented end-to-end CI/CD pipelines using Azure DevOps and GitHub Actions with multi-stage YAML pipelines and automated deployments.
- Automated build, test, security scan, and deployment processes improving deployment efficiency and reducing manual errors.
- Deployed and managed Azure Kubernetes Service (AKS) clusters with containerized applications using Docker and Helm.
- Implemented Infrastructure as Code (IaC) using Bicep, ARM Templates, and Terraform for automated cloud provisioning.
- Managed Azure cloud resources including App Services, VMs, Storage, Functions, and Container Registry (ACR).
- Configured Azure Key Vault and RBAC for secure secrets management and role-based access control.
- Established monitoring and logging using Azure Monitor, Log Analytics, Application Insights, Prometheus, and Grafana.
- Optimized CI/CD pipelines, troubleshooting deployment failures, and ensuring high availability and zero-downtime releases.
- Collaborated with development, QA, and infrastructure teams to streamline DevOps workflows and automation solutions.

- Implemented DevSecOps practices including secure pipelines, vulnerability scanning, and compliance-focused deployments.

KEY PROJECTS

Enterprise CI/CD & Azure DevOps Automation Platform

Tech Stack: Azure DevOps, GitHub Actions, Docker, AKS, Bicep, Terraform, Key Vault

- Architected multi-stage CI/CD pipelines (Code → Build → Test → Scan → Deploy) for multi-tenant SaaS applications.
- Automated infrastructure provisioning and application deployment using IaC and pipeline automation.
- Integrated security scanning, artifact management, and release gates ensuring secure DevOps lifecycle.
- Reduced deployment time and improved release reliability through pipeline optimization.

Kubernetes (AKS) Microservices Deployment & Monitoring

Tech Stack: Kubernetes (AKS), Docker, Helm, Azure Monitor, Prometheus, Grafana

- Containerized and deployed microservices on AKS with auto-scaling and high availability architecture.
- Implemented monitoring dashboards and alerting for infrastructure and application performance.
- Enabled zero-downtime deployments using rolling updates and automated rollback strategies.
- Improved system uptime, scalability, and resource utilization through DevOps best practices.

SOFT SKILLS

- Strong Analytical and Problem-Solving Skills
- Communication and Collaboration
- Troubleshooting and Incident Resolution
- Adaptability and Continuous Learning
- Team Collaboration and Stakeholder Coordination

CERTIFICATIONS

- Microsoft Certified: Azure DevOps Engineer Expert (AZ-400)
- Microsoft Certified: Azure Developer Associate (AZ-204)

EDUCATION

Bachelor of Commerce (Information Technology) – The American College, India (2019 – 2022)
