EDUCATION

B.com (Information Technology)

The American College , Madurai, Tamil Nadu

2019-2022

SKILLS

- **Languages:** Dart
- **Backends:** RESTful APIs, WebSockets, Firebase, MongoDB, PostgreSQL
- **DevOps & CI/CD:** Docker, Jenkins, GitHub Actions, AWS, Azure, TeamCity
- **Testing & Debugging:** Unit Testing, Widget Testing, Postman, Firebase Crashlytics, Flutter DevTools
- **Expertise:** Clean Coding, Cross functional collaboration, Responsive development.

EXPERIENCE

Mobile Application Developer

2023 - Present

Tamuinfotech, Tamil Nadu

- Spearheaded cryptocurrency application development, integrating secure wallets with multi-factor authentication and biometric login, attracting 500+ new users in the first month and solidifying platform security.
- Implemented **MVVM & MVC** patterns, reducing development time by **25%** and improving code efficiency by **30%**.
- Achieved **97%** positive user feedback by following Google's Material Design & Apple's HIG, ensuring better usability.
- Improved app performance by **35%** using Flutter's async programming (Future, Stream, RxDart). Reduced crashes by **20%** with advanced memory management & state management (Provider, BLoC, Riverpod).
- Automated CI/CD pipelines using **Codemagic, GitHub Actions, and Firebase**, improving deployment speed by **40%**.
- Built **20+ custom UI** components, enhancing code reusability by **40%** and reducing UI development time.
- Integrated **biometric authentication** (Face ID, Touch ID, OAuth2), increasing app security by **95%**.
- Accelerated API response times by **30%**, ensuring seamless user experience and lower latency.
- Managed cloud deployments on Firebase, AWS, and Google Cloud, ensuring scalability, reliability, and high availability.
- Integrated complex, cross-platform animations into the Flutter application using Rive, Lottie, and custom effects; this resulted in 5-star ratings from beta testers in 90% of polled users.

PROJECT

Algorithm Application

- Engineered a live **Algo Trading App** with real-time order execution, **automated trade alerts**, and **custom strategies** for optimized performance.
- Developed a high-speed order processing system, ensuring low-latency execution and minimal slippage. Designed an intuitive and responsive UI, enhancing strategy execution efficiency and **performance tracking**.
- **Integrated push notifications** for real-time trade alerts and better engagement. Enhanced security with **Two-Factor & Biometric Authentication**, reducing unauthorized access by **20%**. Optimized backend for real-time market data updates every second.
